

## Digital Voice Annunciator

- Concealed record button microphone
- Automatic Annunciation
- Message triggered by opening front door
- Message triggered only at night
- Up to 20 seconds of recorded message
- Aid to wandering problems

### APPLICATIONS

The SEN1020 is a simple device usually fitted beside the door that replays a pre-recorded message when the unit is triggered by the action of the door opening.

The unit comes complete with a digital time clock.

The time clock enables the door to be used during the day without triggering the message.

The time clock comes set to be active from 7.00pm through to 7.00am. The active time can be easily changed.

The message can be up to 20 seconds long and can be recorded by a relative or carer.

The wording of the message should be altered every two weeks to keep the message 'fresh'.

Powered by a plug-in power supply.
