

Smart Technology, Made to Care

Climate

Temperature and Humidity Sensor

The Cair Climate is a temperature sensor and humidity sensor all in one, small, discreet device.

It can detect high and low temperatures, a fast rise in temperature, and high and low humidity levels. The Climate contains a selection of 8 different threshold levels for each option, and is easy to program with the on-board button.

The Climate can help maintain a healthy temperature within the home, and the humidity detection also assists with monitoring the environment for those living with long term conditions such as COPD.

Climate

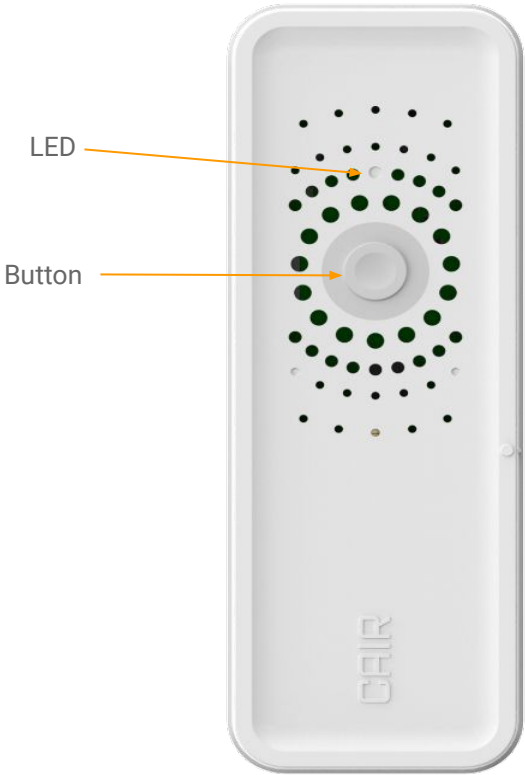

Temperature and Humidity Sensor

Features list

- High, Low and Rate of Rise Temperature Options
- High and Low Humidity Options
- Configured using on board button
- Ability to disable features if required

Specifications

Operating Frequency	869 MHz / Custom
Dimensions	Adhesive mount - L94 x W33 x D12.3mm Screw mount - L119 x W34 x D16mm
Battery	Replaceable CR2450 Coin Cell
Battery Life	3 years
Auto Low Battery	Battery tested daily
Mounting Options	Adhesive Mount, and Screw Mount
Wireless Range	600m line of sight
Operating Temp.	-10°C to +55°C
Compliance	CE / RoHS 2 / RED
Warranty	24 months
